

BIM.VU

One & Only BIM Standard Management System on the cloud

Digitize and share project BIM Execution Plans on the cloud.

Manage project level LODs and Clash Detection Matrices directly on the browser.

Share BEPs across all team members for enhanced communication & BIM management.

Features

Project Profiles

Manage all project profile details including BIM templates.

BIM Milestones

Document BIM milestones and deliverables seamlessly.

Project Configuration

Configure project into blocks, towers & levels for coordination.

Modelling Standards

Document & share BIM Modelling standards across board.

Level of Details (LOD)

Standardize discipline specific LODs for each project stage.

Clash Matrices

Document & prioritize clash reports for each block individually.

Role Based Access

Share BEPs with unlimited team members with access control.

Quality Reports

Document & share all BIM quality reports for each discipline.

Team Communication

Efficiently communicate & resolve BIM issues among all teams.

Implementation

Implementing BIM.VU is an easy 3 step process with the help of pre-set industry standard BEP templates provided for all users.

Create project from template

Configure project for LODs & Clash Matrix

Invite & share with all unlimited users
